App name

Busy Eats

Minimum Viable Product Features

- Browse restaurant/food options near user.
- Ability to select restaurant and place order.
- Enable GPS functionality to find local restaurants.
- Ability to enter delivery address.
- Ability to register and enter restaurant information.
- Ability to view incoming orders and necessary customer info.

User Stories

1.) As a food conscious person, I want the ability to sort restaurants by some key ingredients so I can get the specific kinds of food I am looking for and avoid certain ingredients.
2.) As a local pizza place owner, I want the ability to show users specials and discounts that can help drive sales for my business.
3.) As someone who is often very hungry by lunch break at the office, I want the ability to see how long it will take for my food to arrive before placing orders so I can go with the fastest option.
